

Infused Gummies - LorAnn Recipe

By: magikh0e - 09/25/24

You will need:

- [GUMMY MIX](#) - See notes at the end
 - Infused MCT OIL **and/or** 1mL RSO / Distillate Syringe - (use either or both)
- WARNING:** Only use both MCT Oil and RSO/Distillate if you have a high tolerance and understand what you are doing..

Optional Additives:

- [Flavors](#) - (helps disguise the cannabis flavor)
- [Preserve-It Mold Inhibitor Preservative | LorAnn Oils](#) or Lemon Juice (helps with gummies shelf life)
- [CITRIC ACID](#) - (if you prefer a more sour taste)
- Lecithin - (Helpful when using MCT oil)
- Food Colouring

Ingredients:

- ¼ cup of **COLD** water
- ⅓ of LorAnn Gelatin Packet (**22 Grams**) - Comes with LorAnn gummy mix.
- ¼ cup of **WARM** water
- ⅓ of LorAnn Gummy Mix Bag (**146 grams**) - Allows you to get 3 batches per bag
- 2 Tbsp of Infused MCT Oil &/OR 1mL Syringe of RSO/Distillate
- ¼ Tsp of Citric Acid Granules
- ½ Tsp of Lecithin
- 1 Tsp of LorAnn Flavoring oil or Emulsion
- ¼ Tsp of LorAnn Mould Inhibitor **OR** 1 Tsp of Lemon Juice - (Optional)
- Food Colouring (*Optional*)

Step 1

- Add COLD water to a small bowl.
- Sprinkle the LorAnn Gelatin across the water and gently push the powder down with a fork until all of the powder is saturated.
- Once saturated, set aside and allow the mixture to bloom.

Step 2

- Add ¼ cup **WARM** water to a pot & place on the stove on a **LOW/MED** temp setting
- Add ⅓ of the LorAnn Gummy mix to the **WARM** water and stir it up.
- Continue stirring until all the mixture has melted and you no longer see clumps.
- Once the mixture is completely melted, remove the pot from the heat source.
- Once the bubbling has stopped, you can now pour in the Gelatin bloom from **Step1**.
- Continue to stir until all of the gelatin has been mixed up and you no longer feel any clumps. Allow the mixture to cool for 1-2 minutes. - (this could be up to 10 mins of stirring!)
- Use a large spoon, lightly collect the top layer of foam that has formed on top of the and discard it.

Step 3

- Add your MCT OIL **AND/OR** 1mL RSO or Distillate Syringe
- **OPTIONAL Steps:**
 - Add ½ tsp of Lecithin
 - Add 1 tsp of flavouring oil **OR** emulsion
 - Add ¼ tsp of LorAnn Mould Inhibitor **OR** use 1 Tsp of Lemon Juice
 - Add 1 tsp of food colouring
- Stir the mixture, and then stir some more to mix everything up really well. Ensure the temp does not burn the mixture.

Step 4

- Place your moulds on some sort of stable tray and begin filling each cavity with the infused mixture..
- Allow the mixture to cool in the mould for 15-30 mins, then place them inside a freezer for 10-15 minutes.
- Remove the gummies from the moulds and place on a wire rack or a parchment paper sheet to continue drying for the next 24-48 hours.
- After the dry is done, store the edibles inside an airtight container in the fridge

NOTE:

- The preferred gummy mix is by LorAnn Oils, everything else brands can be substituted for something else..
- If you use Infused MCT oil, you should also use the optional Lecithin in your mix during **Step3**.
- If your mixture thickens during **Step 4**, you can apply some low heat to the bot and stir the mixture before continuing,
